PROG2111 – Relational Databases (Fall 2025)

Final Project Contribution Log

Health Care – Electronic Medical Records (EMR)

Group Number: 6

Happy

Tri Phan

Nathanael Agnintedem Tsayem

Date**:** December 2025

Contribution Summary

Member Name	Primary Role	Phases/Tasks Completed
Happy	Use Case & Data Modeling	**Phase 1:** Project idea & use case write-up. **Phase 2:** Identified key entities/attributes and contributed to the ERD content and description.
Nathanael Agnintedem Tsayem	Normalization & Documentation	**Phase 3:** Completed normalization documentation from 1NF to 3NF aligned with the approved ERD. **Project Log:** Prepared and finalized the group contribution log for submission.
Tri Phan	Database Implementation & Programming	**Phase 4:** Wrote and tested MySQL DDL script to create the EMR schema with correct PK/FK constraints. **Phase 5:** Implemented C# programmatic access and CRUD operations using ADO.NET MySQL library.

Team Collaboration Notes

Our team divided responsibilities by project phase to ensure efficient delivery. The Phase 3 normalization results were verified to align with the Phase 2 ERD structure. The Phase 4 DDL script and Phase 5 C# CRUD implementation were developed based on the finalized 3NF tables. Each team member reviewed the combined deliverables to ensure consistency across documentation, database schema, and program functionality.

Deliverable Ownership

- Phase 1–2 Document/ERD: Happy
- Phase 3 Normalization Report + Project Log: Nathanael
- Phase 4 DDL + Phase 5 C# CRUD: Tri Phan
